Primary Presenter: **Mike Weibel**

Session Title: **Medical Reserve Corps**

Session Short Description: **Several local health departments and other agencies across the state have started planning for the development of Medical Reserve Corps units in their communities. This roundtable discussion will include an exchange of ideas and best practices moderated by Mike Weibel, director of Utah's first Medical Reserve Corps. The US Department of Health and Human Services Acting Regional Health Administrator, Jane Wilson, will also share ideas from MRCs throughout the region and country**

Learning Objectives: **Understand the relationship between Medical Reserve Corps units, the USA Freedom Corps and Citizen Corps.
Describe the steps necessary to form an MRC unit in your community.
Provide examples of how MRC units can be utilized during a disaster and during non-emergency events.
Describe challenges facing MRC units in Utah, including liability and licensing issues.
Know where to go for more information on the Medical Reserve Corps program.**

Date:

10/19/2004

Time:

9:00 AM

Room:

Grand Ballroom

Primary Presenter: **CDR Melissa Sanders, RD**

Session Title: **Hospital Preparedness, A Federal Perspective: Where We've Come From, Where We Are and Where We're Going**

Session Short Description: **As chief of the National Bioterrorism Hospital Preparedness program I will give a short history on where the program has come in the past 3 years, where we are currently and where we hope to go in the last 2 years under the current authorizing legislation. I have been asked to focus on trends and future directions and how to best get there.**

Learning Objectives: **Participants will be able to clearly articulate where the federal investment in hospital preparedness started and has evolved to.
Participants will learn of future trends in the hospital preparedness program and how best to meet those trends.**

Other Presenters:

Session Type:

Keynote

< [Back to Master Schedule](#) >

Session Details for 10/19/2004

Session #:	Date:	Time:	Room:
221	10/19/2004	10:30 AM	Grand Ballroom

Primary Presenter: **Dr. John S. Urbanetti, MD, FRCP(C)**

Session Title: **Terrorism and Public Health**

Session Short Description: **Acts of terrorism represent a complex amalgam of medical and psychological injury. This combined effect is geometrically limiting to the involved patients and results in an exponential increase in the medical/social cost of a terrorist event. Several terrorist acts will be discussed and possible public health interventions will be explored.**

Learning Objectives: **Be able to detail development of terrorism as it has been used in warfare throughout history.
Be able to distinguish between "criminal" and "warfare" interpretations of terrorism acts.
Be able to enumerate the relative numbers and types of medical/psychological injuries resulting from a terrorist event.
Be able to explain the medical/social "cost" of a terrorist act.
Be able to identify several possible public health interventions in both the near and long term effects of a terrorist act.**

Session Details for 10/19/2004

Session #:	Date:	Time:	Room:
241	10/19/2004	1:30 PM	Parlor 1

Primary Presenter: **Ms. Amy Pine, M.P.H.**

Session Title: **Vaccination Ventures: Outcomes of a Mass Smallpox Vaccination Clinic Drill in San Francisco**

Session Short Description: **Will discuss the planning, implementation and evaluation of a large-scale smallpox vaccination clinic exercise held in San Francisco, CA in June 2003.**

Learning Objectives: **Identify at least three key components necessary for planning a mass vaccination clinic.
Illustrate an operational model for efficient clinic flow.
Identify effective marketing strategies targeting different audiences: staff, clients, and the media.
Identify evaluation tools used in San Francisco exercise.
Discuss challenges and lessons learned from San Francisco exercise.**

Other Presenters:

Session Type: **Breakout**

< [Back to Master Schedule](#) >

Session Details for 10/19/2004

Session #:	Date:	Time:	Room:
242	10/19/2004	1:30 PM	Parlor 2

Primary Presenter: **Barbara Jepson, MPA, MT(ASCP)**

Session Title: **New Forensic Partners: Public Health, Laboratory, First Responders, First Receivers and Law Enforcement**

Session Short Description: **Target audience is public health investigators such as epidemiologists, nurses, environmental health scientists, laboratory workers and also hospital employees, Hazmat teams or others involved in a bio or chem terrorism event who need to submit samples to the public health laboratory. This will be a presentation on forensic public health investigations, especially as they relate to terrorism. Topics to be covered are collection of evidence, chain-of-custody, documentation and disposition of evidence. A brief part will cover testifying in court. This presentation will emphasize how forensic investigation is similar to regular epidemiological or public health investigations. Practical suggestions and tips will be discussed.**

Learning Objectives: **Learn how public health investigations are very similar to forensic investigations. Learn the role of the laboratory in testing for bioterrorism and chemical terrorism agents. Learn how to maintain a chain-of-custody on samples submitted to the laboratory.**

Other Presenters:

Session Type: **Breakout**

Primary Presenter: **Michael Stever**

Session Title: **"Scratch 'n Sniff" Bioterrorism Training/Exercise: Lessons Learned**

Session Short Description: **This module will highlight lessons learned from a 4 day city-wide bioerrorism training/exercise conducted in Salt Lake City.**

Learning Objectives: **Be aware of how an Integrated Emergency Management course is created and conducted and how this exercise-based course will benefit Biological Terrorism Preparedness.
Develop and understanding and appreciation of how different teams and agencies come together for successful Biological Terrorism training and exercise
Have a working knowledge of how a community and supporting organizations can benefit from participating in an Integrated Emergency Course.
Be able to identify shortfalls and lessons learned by Salt Lake City and supporting organizations to apply in their own plans, training, and exercises
Be able to identify resources that can be used to conduct exercise based training.**

Session Details for 10/19/2004

Session #:	Date:	Time:	Room:
251	10/19/2004	2:30 PM	Parlor 1

Primary Presenter: **Alaina Dall, MA**

Session Title: **Who will care for the low income and uninsured population in a disaster? The role of Community Clinics and Health Centers in a coordinated planning and response.**

Session Short Description: The purpose of this session is to describe the role of community clinics and health centers (CCHC) in planning for and responding to a disaster in the context of a well-coordinated, area wide response. A clinic will be pressed into service during an emergency, first because it is the provider of choice for its patients, secondly in a large scale disaster hospitals may not be able to handle the volume of patients needing services. This session will describe the potential role of CCHC's in a disaster and a case study will look at how San Diego clinics responded in the Fire Storm Disaster of October 2003. It will describe simple steps clinics can take immediately to enhance their readiness, and suggest strategies for optimizing partnerships with government hospitals and community organizations.

Learning Objectives: **Describe at least 5 types of disaster services community clinics and health centers (CCHC'S) can provide to their patients in surrounding communities in event of a disaster**
Identify opportunities to develop procedures for communication and coordination between county health and emergency response departments, hospitals, clinics and community partners before a disaster occurs.
Describe how CCHC's will be able to relieve crowded hospitals and emergency rooms in a disaster.
Understand the role of the CCHC's in San Diego during the Fire Storm Disaster of October 2003; View videotape of their experience
Describe how CCHC planning and preparedness is both similar to and different from hospital and county efforts; identify 5 simple steps clinics can take today to enhance their readiness to help their patients and surrounding communities who will seek care at their sites in a disaster.

Susan Mottice, PhD

Session Type:

Epidemiology Breakout

< [Back to Master Schedule](#) >

Session Details for 10/20/2004

Session #:	Date:	Time:	Room:
312.1	10/20/2004	8:00 AM	Parlor 2

Primary Presenter: **Robert Snarr, S.S.W., M.P.A., C.P.C.I.**

SessionTitle: **Mental Health Leadership and Partnership Issues in Disaster and Bioterrorism Response**

Session Short Description: **Leadership and Partnership Issues in Disaster and Bioterrorism Response includes education on organizational assessment, effective leadership and collaboration, disaster leaders and team members, how to determine the most appropriate agencies to contact in meeting the needs of the public, expectations and needs of agencies and how to make the deals work with key stakeholders.**

Learning Objectives: **Will be able to reflect upon effective leadership and collaboration during disasters.
Will be able to reflect upon for effective partnerships disaster response.
Will identify potential partnerships among appropriate agencies.**

Other Presenters:

Session Type: **Special Populations Breakout**

Primary Presenter: **Dr. Judith Holt, PhD**

Session Title: **Emerging National Issues on Emergency Preparedness for People with Disabilities**

Session Short Description: **The session will provide an overview of emerging national issues and identify current challenges in providing emergency preparedness for people with disabilities. Practical strategies as well as relevant resources to address emergency preparedness for people with disabilities will be discussed.**

Learning Objectives: **Participants will be able to identify 5 current challenges in providing emergency preparedness for people with disabilities.
Participants will develop an understanding of key areas for consideration by their agency in emergency preparedness for people with disabilities.
Participants will gain knowledge about relevant resources to address emergency preparedness for people with disabilities.**

Other Presenters:

Session Type: **Special Populations Breakout**

Primary Presenter: **Sharon Talboys, MPH**

Session Title: **Training vs. Performance: "All this training & I still don't feel prepared!"**

Session Short Description: **This session will 1)compare and contrast training needs vs. performance needs, 2)provide tools for assessing performance needs, and 3)Propose ways to incorporate both training and performance needs assessments into our preparedness efforts.**

Learning Objectives: **Recognize the differences and similarities in training and performance needs.
Apply performance assessment tools to their own personal needs as well as their agency's performance needs.
Think critically about the fundamental training & performance issues that will lead to a better prepared public health and healthcare workforce.**

321	10/20/2004	9:45 AM	Parlor 1

Primary Presenter: **Dr. Carol Blair, Ph.D.**

Session Title: **“Microbial Threats in the New Millenium”**

Session Short Description: **List of factors known to be important in emergence of infectious disease agents, both natural and purposeful. Examples of roles these factors play and how they can be counteracted. Identification of new, emerging, or re-emerging infectious diseases of humans and other animals, with selected descriptions of the circumstances of their appearance and identification.**

Learning Objectives: **List the factors that have and will continue to play a role in emergence of infectious disease agents.
Identify the types of infectious disease agents that pose threats if/when they emerge, re-emerge, or are puposefully introduced.
Define examples of research, surveillance, and identification strategies that target emerging infectious diseases.**

Primary Presenter: **Mike Weibel**

Session Title: **Medical Reserve Corps**

Session Short Description: **Medical Reserve Corps units are groups of volunteer medical professionals and lay people who can assist existing hospital, prehospital and public health agencies during an emergency. This is particularly important in dealing with the expected surge on our hospitals during disasters and other mass casualty events. Learn what it took to get Utah's first MRC started, how it will operate in disasters and non-emergency events, and what challenges face MRC units in Utah.**

Learning Objectives: **Understand the relationship between Medical Reserve Corps units, the USA Freedom Corps and Citizen Corps.
Describe the steps necessary to form an MRC unit in your community.
Provide examples of how MRC units can be utilized during a disaster and during non-emergency events.
Describe challenges facing MRC units in Utah, including liability and licensing issues.
Know where to go for more information on the Medical Reserve Corps program.**

Session Title: **Preparing Physicians for Recognizing and Responding to Bioterrorism: A Needs-based Approach**

Session Short Description: **This session will provide recommended approaches to preparing physicians to recognize and respond to bioterrorism based on the results of a recently conducted needs assessment. These recommended approaches will combine theoretical approaches to training physicians with specific results from the needs assessment. Strategies for successful physician education will be provided.**

Learning Objectives: **Able to distinguish the different content areas for preparation by physician type
Able to identify the preferences for delivery of education by physician type
Able to develop an educational plan consistent with content area and delivery preference of physician type
Able to develop evaluation of educational efforts designed to improve physician preparedness**

Countering Bioterrorism 2004 Preparedness through Partnerships

Session Details for 10/20/2004

Session #:	Date:	Time:	Room:
331	10/20/2004	10:45 AM	Grand Ballroom

Primary Presenter: **Craig Knight**

Session Title: **"Partnering with Utah's Volunteer Organizations Active in Disasters (VOAD)"**

Session Short Description: **VOAD's play an important role in all four phases of the emergency management cycle. Public health professionals and emergency responders will learn how they can effectively partner with the UVOAD and NVOAD and their member organizations to prepare for, respond to, recover from and mitigate disasters of all kinds. Preparing for disasters, both terrorist and natural, requires planning, training, covening and partnering, the four main activities of the UVOAD. Learn about its mission and how it uses the four C's to strengthen its relationships to governmental organizations. In a disaster, voluntary organizations are among the first to arrive and the last to leave. Participants will discuss the "Synergy of Structure and Good Intentions", a plublication by NVOAD and the Points of Light Foundation, which addresses the management of spontaneous volunteers in times of disaster.**

Learning Objectives: **Define the role of Voluntary Organizations Active in Disaster (VOADs) in the four phases of the emergency management cycle and their relationship to governmental organizations.
Identify member organizations of UVOAD and how to effectively partner with those organizations.
Describe the four main activities of the UVOAD and the strategies for integrating planning and training with partner organizations.
Identify the 10 national principles and values which guide the management of spontaneous volunteers in times of emergency.**

Primary Presenter: **Mr. Glenn Sullivan, M.S.**

Session Title: **Suicide Terrorism: Organizational and Individual Factors**

Session Short Description: **Suicide terrorism is the most lethal and effective method of terrorism that has been encountered by democratic societies. The history of suicide terrorism will be reviewed, and the techniques used by terrorist organizations to recruit, train, and facilitate suicide attackers will be analyzed. Special attention will be paid to individual acts of suicidal terror, and the impact of suicide terrorism on society.**

Learning Objectives: **Understand the organizational factors that contribute to the phenomenon of suicide terrorism.
Recognize the critical differences between acts of individual suicidal terrorism and organized suicide terrorism.
Evaluate the likelihood of suicide terror campaigns in the United States, and their potential societal impact.**

Session #:	Date:	Time:	Room:
350	10/20/2004	1:30 PM	Grand Ballroom

Primary Presenter: **Robert J. Howard PhD, E. MBA, MPH**

Session Title: **Crisis Dynamics**

Session Short Description: In critical events, either man or acts of God, people act and react in ways which are to a great extent predictable and in a manner for which public safety, public health, police, fire, EMT, elected and site officials can preplan and consider as they seek to manage such events. The natural curiosity of people as well as the actions of family members and loved ones will draw them to the scene of a critical event. This of course will in turn draw the attention of the media and appointed, elected and associated officials who feel compelled to be "on the scene." It is to the extraordinary advantage of all facility and public safety officials to consider the issue of crisis dynamics when they are planning for the controlled management of such critical events. Recent history is replete with examples of what occurs when public and facility officials give no thought to how they will manage a critical event in the presence of loved ones inside a compromised facility, police, fire engines, EMTs, sirens, media, helicopter, public officials on site commenting on the action and events, police, sheriff, SWAT teams communications challenges. The Belsan, Russia school hostage crisis serves as a startling example of a lack of preparation while the actions of police and fire officials on the scene of the 9/11 event revealed to us what preplanning, real world training, and flexibility provides and achieves.

Learning Objectives: **Understand and define the benefit of preplanning and real world training for critical events.**
Apply and explain the actions, dynamics and movement of all public safety officials, citizens, victims, family members, and support personnel can be managed and controlled through the use of thoughtful and real world review and training for every potential threat risk in a given community.

Primary Presenter: **Teresa Garrett, RN MS**

Session Title: **Quarantine and Isolation...What is your role?**

Session Short Description: **This workshop provides basic information on terminology, epidemiology, agency roles, legal aspects and how they apply in a Quarantine or Isolation event.**

Learning Objectives: **Define quarantine, isolation, incubation, vector, transmission, and periods of infectiousness
Identify essential organizations and their involvement in “real life” events of quarantine and isolation
Understand how specific state statutes apply to quarantine and isolation
Clarify roles and responsibilities within your organization as well as with participating organizations
Establish a process in which to accomplish the tasks at hand**

Other Presenters: **Doug Springmeyer, JD**

Session Type: **Workshop**

Primary Presenter: **Dr. Royce Moser, Jr., M.D.**

Session Title: **Developing the Utah Medical Surge Plan for Mass Casualty Incidents**

Session Short Description: **The session will summarize the process involved in developing a plan to provide for 1,250 casualties resulting from terrorism or natural events. Results of the effort will be presented as an aid to those involved in disaster response planning.**

Learning Objectives: **Describe the nature of threats that may produce mass casualties.
Summarize the roles of local and state health departments and Utah medical facilities in responding to such an event.
Delineate areas of particular concern, including command and control, communication, and coordination.
Obtain initial treatment protocols for trauma and burn patients as well as for those exposed to chemical, biological, or nuclear agents.
Summarize sources of assistance during mass casualty incidents.**

Other Presenters: **Colleen Connelly, RN, BSN**

Session Type: **Workshop Part I**

< [Back to Master Schedule](#) >

Session Details for 10/20/2004

Session #:	Date:	Time:	Room:
362.1	10/20/2004	2:30 AM	Parlor 2

Primary Presenter: **Colleen Connelly, RN, BSN**

Session Title: **Code BIO: The development of a new hospital code for highly infectious patients**

Session Short Description: **One patient with a potentially highly infectious disease presenting to your facility can cause disruption, at best, or cessation of services at worst. This session will detail a process to deal with these situations, caring for your staff, the patient and your facility. The steps are simple and can be applied by any facility or agency.**

Learning Objectives: **Discuss the need for a separate plan specific to dealing with patients with highly infectious disease.
Identify the players, who needs to be involved in the planning process.
Define the steps taken in the development of the new code.
Discuss problems that were encountered and what was done to overcome them.
Identify continuing concerning issues specific to patients with highly infectious disease.**

Other Presenters:

Session Type: **Workshop Part II**

< [Back to Master Schedule](#) >

Session Details for 10/20/2004

Session #:	Date:	Time:	Room:
363	10/20/2004	2:30 PM	Parlor 3

Primary Presenter: **Kevin Thompson, M.S.**

Session Title: **A Brief Introduction to the National Incident Management System for Public Health**

Session Short Description: **This session will present a brief introduction to Incident Command System (ICS) and the National Incident Management System (NIMS) and the role of public health in these systems. The session will include information on current ICS training curricula including the new ICS for Public Health and Health Care course recently published by the Emergency Management Institute.**

Learning Objectives: **At the conclusion of the course, participants will successfully:**

- 1. Identify at least two emergency response capacities for public health agencies that require the ability to work within the ICS.**
- 2. Understand HSPD-5 mandating the use of ICS/IMS by all agencies as a requisite for receiving Federal disaster assistance.**
- 3. Diagram an incident command organizational chart for their agency in response to a public health emergency.**

Recognize the necessity of using the incident command system in order to fulfill the public health roles and responsibilities during an emergency.

Other Presenters:

Session Type: **Workshop**

Session Details for 10/21/2004

Session #:	Date:	Time:	Room:
411	10/21/2004	8:00 AM	Parlor 1

Primary Presenter: **Patrick Luedtke, MD, MPH**

Session Title: **Forensic Epidemiology**

Session Short Description: **This workshop is an introduction to Forensic Epidemiology. Principles of epidemiology, crime scene procedure, and forensic and public health lab procedures will be covered as well as how public health and law enforcement work together at the scene of a Bioterrorism event.**

Learning Objectives: **Demonstrate an understanding of the similarities and differences in public health and law enforcement investigative goals and methods
Show an understanding of crime scene procedures
Demonstrate an understanding of the legal issues surrounding bioterrorism
Recognize when to involve the other discipline after the problem is acknowledged
Communicate and share information between law enforcement and public health**

Other Presenters: **Mr. Rex Olsen, JD
Dave Cunningham, RN, MSN
Barbara Jepson, MPA, MT(ASCP)
Mr. Jay Henry, BS, D-ABC**

Session Type: **All Day Workshop**

Session Details for 10/21/2004

Session #:	Date:	Time:	Room:
412	10/21/2004	8:00 AM	Parlor 2

Primary Presenter: **Robert Howard, PhD, E.MBA, MPH**

Session Title: **Getting Ready for Primetime....Delivering a SOCO**

Session Short Description: **The objective of this training is to provide the attendee/participant with a skill set and awareness enabling them to select, shape and deliver, targeted Single Overriding Communications Objectives to print and broadcast media in feature and breaking news situations. Objectives are achieved by analyzing case studies of interviews with ranking and mid-level officials in a variety of media settings. Interactive critique and discussion of video and print interviews are pivotal in the process of imparting these lessons. Participants actively engage in learning to develop and deliver key messages of control and prevention. This presentation must employ all media forms and be highly interactive.**

Learning Objectives: **Participants will apply and develop a better understanding of the process/environment leading to the need for focused and targeted SOCOs, and the manner in which these communication strategies can be achieved. Each participant will be able to describe the physical and mental tools and techniques permitting them to triage, develop and evaluate their effectiveness in interview settings.**

Other Presenters:

Session Type: **All Day Workshop**

< [Back to Master Schedule](#) >

Session Details for 10/21/2004

Session #:	Date:	Time:	Room:
413	10/21/2004	8:00 AM	Parlor 3

Primary Presenter: **Mr. Pete Dufour**

Session Title: **Prevention and Response to Suicide Bombing Incidents**

Session Short Description: **This 4 hour session will define the suicide bombing threat, identify unique situational hazards for first responders, and identify indicator and warnings of terrorist activity within a jurisdiction. Two hours will be placed on post-blast issues and response applicable to all responders with emphasis on EMS issues applicable to all type of bombings and those unique to suicide bombings.**

Learning Objectives: **Define suicide terrorism, differentiate the types of suicide bombings attacks; identify likely targets of suicide bombings; and recognize the nine phases of a suicide bombing attack.
Describe jurisdictional strategic actions designed to counter the suicide bombing threat
Describe procedural and structural countermeasures for preventing or deterring suicide bomb attacks, identifying and responding to attacks, and mitigating effects of an attack.
Identify local tactics, techniques, and procedures governing response to suicide bombings. Identify first responder roles.
Identify most likely injuries and triage issues, scene stabilization issues, secondary device issues, post-blast perimeters, and personal protection issues**
